CONTENTS OF VOLUME 22

Volume 22, No. 1, 1990

Editorial 1

Clinical Sciences

Clinical Symposium: Exertional Heatstroke: An International Perspective
Chairpersons: Roger W. Hubbard and Lawrence E. Armstrong

An introduction: the role of exercise in the etiology of exertional heatstroke
R. W. Hubbard 2

Field and clinical observations of exertional heat stroke patients
Y. Shapiro and D. S. Seidman 6

Emergency treatment of exertional heatstroke and comparison of whole body cooling techniques
Anthony Costrini 15

Heatstroke pathophysiology: the energy depletion model
Roger W. Hubbard 19

Heat intolerance: predisposing factor or residual injury?
Y. Epstein 29

Time course of recovery and heat acclimation ability of prior exertional heatstroke patients
Lawrence E. Armstrong, Jane P. De Luca, and Roger W. Hubbard 36

Clinical Investigations

Effects of exercise and exercise conditioning on blood platelet function
Richard B. Davis, David G. Boyd, Mark E. McKinney, and Clinton C. Jones 49

Interpreting the relationship between age of menarche and prepubertal training
J. M. Stager, J. K. Wigglesworth, and L. K. Hatler 54

Basic Sciences/Regulatory Physiology

Symposium: Control of Pulmonary Gas Exchange Dynamics during Exercise
Chairpersons: Brian J. Whipp and Richard Hughson

The body as a bioenergetic system—lessons from systems engineering and comparative physiology
Dag Linnarsson 59

Physiological determinants of pulmonary gas exchange kinetics during exercise
Brian J. Whipp and Susan A. Ward 62

Exploring cardiorespiratory control mechanisms through gas exchange dynamics
Richard L. Hughson 72

Assembling control models from pulmonary gas exchange dynamics
George D. Swanson 80

Variables, constants, and parameters: clarifying the system structure
Norman Lamarra 88

Original Investigations

Physiologic and structural indices of vascular function in paraplegics
Jeffrey S. Shenberger, Gretchen J. Leaman, Marsha M. Neumyer, Timothy I. Musch, and Lawrence I. Sinoway 96

Effect of fructose 1,6-diphosphate infusion on the hormonal response to exercise
Jonathan Myers, J. Edwin Atwood, Susan Forbes, Michael Sullivan, Sarbjit Sandhu, Doug Walsh, and Victor Froelicher 102

Applied Sciences

Original Investigations

Differential responses to proprioceptive neuromuscular facilitation (PNF) stretch techniques
Louis R. Osternig, Rick N. Robertson, Richard K. Troxel, and Paul Hansen 106

Metabolic responses to controlled frequency breathing in competitive swimmers
Glenn P. Town and J. Mark VanNess 112

The effectiveness of weight-belts during the squat exercise
Jeffrey E. Lander, R. Leslie Simonton, and Joel K. F. Giacobbe 117

Responses of aerobically fit men and women to uphill/downhill walking and slow jogging
James M. Pivarnik and Nestor W. Sherman 127

Special Communications

Technical Note

The validity and relevance of tests used for the assessment of sports surfaces
Benno M. Nigg 131

Information for Authors i

Policy Statement Regarding the Use of Human Subjects and Informed Consent vi

Policy Statement of the American College of Sports Medicine on Research with Experimental Animals vii

Volume 22, No. 2, 1990

J.B. Wolffe Memorial Lecture

Neural control of the circulation during exercise
Jere H. Mitchell 141

Clinical Sciences

Case Study

Distal radio-ulnar joint dislocation, ulna volar in a female body builder
Claudio Francobandiera, Nicola Maffulli, and Luciano Lepore 155

Clinical Investigations

Quantitative QRS changes with exercise in children and adolescents
Stephen M. Paridon and J. Timothy Bricker 159

The incidence of hyponatremia during prolonged ultraendurance exercise
T. D. Noakes, R. J. Norman, R. H. Buck, J. Godlonton, K. Stevenson, and D. Pittaway 165

Effects of diltiazem or propranolol during exercise training of hypertensive men
Kerry J. Stewart, Mark B. Effron, Stephen A. Valenti, and Michael H. Kelemen 171

Normoxic and acute hypoxic exercise tolerance in man following acetazolamide
J. M. Stager, A. Tucker, L. Cordain, B. J. Engebretsen, W. F. Brechue, and C. C. Matulich 178

Basic Sciences/Regulatory Physiology

Original Investigations

Ultrastructural events following acute muscle trauma
B. D. Fisher, V. E. Baracos, T. K. Shnitka, S. W. Mendryk, and D. C. Reid 185

Cardiovascular response to sustained maximal voluntary static muscle contraction
James E. Misner, Scott B. Going, Benjamin H. Massey, Thomas E. Ball, Michael G. Bemben, and Louis K. Essandoh 194

Endurance training alters arterial baroreflex function in dogs
Patricia A. Gwirtz, Marilyn A. Brandt, Howard J. Mass, and Carl E. Jones 200

The effect of long endurance running on natural killer cells in marathoners
Lee S. Berk, David C. Nieman, Wesley S. Youngberg, Konstantinos Arabatzis, Maryellen Simpson-Westerberg, Jerry W. Lee, Stanley A. Tan, and William C. Eby 207

Hepatic lipid metabolism in exercise and training
Jan Gorski, Lawrence B. Oscai, and Warren K. Palmer 213

Thermoregulation in mildly hypertensive men during β-adrenergic blockade
Linda S. Pescatello, Gary W. Mack, Charles N. Leach, Jr., and Ethan R. Nadel 222

Applied Sciences

Original Investigations

Physiological effects of a weight loss regimen practiced by college wrestlers
Scott Webster, Richard Rutt, and Arthur Weltman 229

Conditions of isokinetic knee flexion that enhance isokinetic knee extension
Mark D. Grabiner and Doris L. Hawthorne 235

Plasma beta-endorphin concentration: response to intensity and duration of exercise
Allan H. Goldfarb, Bradley D. Hatfield, David Armstrong, and Jeff Potts 241

Effect of a practical neck cooling device on core temperature during exercise
Neil F. Gordon, G. Mitchell Bogdanffy, and Jody Wilkinson 245

Effects of phosphate loading on oxygen uptake, ventilatory anaerobic threshold, and run performance
Richard B. Kreider, Gary W. Miller, Melvin H. Williams, C. Thomas Somma, and Tawfiq A. Nasser 250

Ventilatory threshold and maximal oxygen uptake during cycling and running in triathletes
Donald A. Schneider, Karol A. LaCroix, George R. Atkinson, Philip J. Troped, and Johanna Pollack 257

ACSM Position Stand: The Recommended Quantity and Quality of Exercise for Developing and Maintaining Cardiorespiratopry and Muscular Fitness in Healthy Adults 265

Volume 22, No. 3, 1990

Clinical Sciences

Clinical Symposium: Endocrine Issues in Women's Sports
Chairperson: Christine L. Wells

Effects of exercise training on the menstrual cycle: existence and mechanisms
Anne B. Loucks 275

Effect of exercise on bone: permissive influence of estrogen and calcium
Gail P. Dalsky 281

Metabolic actions of estradiol: significance for acute and chronic exercise responses
Joy C. Bunt 286

Body fat distribution in females: metabolic consequences and implications for weight loss
Barbara N. Campaigne 291

Clinical Investigation

The beta-endorphin responses of pregnant women during aerobic exercise in the water
R. G. McMurray, M. J. Berry, and V. Katz 298

Basic Sciences/Regulatory Physiology

Basic Sciences Symposium: Glucocorticoid Regulation of Muscle Proteins: Antagonism of Exercise and Androgenic-Anabolic Steroids
Chairperson: Robert C. Hickson

Fiber-type discrimination in disuse and glucocorticoid-induced atrophy
Richard R. Almon and Debra C. DuBois 304

Glucocorticoid modulation of cardiac mass and protein
T. T. Kurowski and S. M. Czerwinski 312

Glucocorticoid regulation of muscle branched-chain amino acid metabolism
Kevin P. Block and Maria G. Buse 316

Glucocorticoid-mediated induction of glutamine synthetase in skeletal muscle
Stephen R. Max 325

Glucocorticoid antagonism by exercise and androgenic-anabolic steroids
R. C. Hickson, S. M. Czerwinski, M. T. Falduto, and A. P. Young 331

Original Investigations

Oxygen delivery and cardiac output during exercise following oral phosphate-glucose
E. T. Mannix, J. M. Stager, A. Harris, and M. O. Farber 341

Comparison of two regimens of concurrent strength and endurance training
D. G. Sale, I. Jacobs, J. D. MacDougall, and S. Garner 348

Applied Sciences

Original Investigations

Internal forces at chronic running injury sites
Stephen H. Scott and David A. Winter 357

The evaluation and prediction of impact forces during landings
Janet S. Dufek and Barry T. Bates 370

Control of body mass transfer as a function of speed of ascent in sit-to-stand
Yi-Chung Pai and Mark W. Rogers 378

Changes in stature following drop jumping and post-exercise gravity inversion
M. G. Boocock, G. Garbutt, K. Linge, T. Reilly, and J. D. G. Troup 385

Physiological responses to different roller skiing techniques
Martin D. Hoffman, Philip S. Clifford, Peter J. Foley, and A. Glenn Brice 391

Constant vs variable resistance knee extension training
Renata J. Manning, James E. Graves, David M. Carpenter, Scott H. Leggett, and Michael L. Pollock 397

The mechanical efficiency of front crawl swimming
Huub M. Toussaint, Wilma Knops, Gert de Groot, and A. Peter Hollander 402

Differences in propelling efficiency between competitive and triathlon swimmers
Huub M. Toussaint 409

Volume 22, No. 4, 1990

Hypotheses

Endorphins and exercise: physiological mechanisms and clinical implications
Peter Thorén, John S. Floras, Pavel Hoffmann, and Douglas R. Seals 417

Clinical Sciences

Clinical Symposium: Interdisciplinary Symposium on Muscle Injuries
Chairperson: W. Ben Kibler

Initial events in exercise-induced muscular injury
R. B. Armstrong 429

Muscle strain injuries: clinical and basic aspects
William E. Garrett, Jr. 436

Mechanisms of peripheral fatigue
Donald T. Kirkendall 444

Clinical aspects of muscle injury
W. Ben Kibler 450

Rehabilitation of muscle injuries
Stanley A. Herring 453

Muscle conditioning and muscle injuries
Michael H. Stone 457

Clinical Investigation

Fatigue, recovery, and low back pain in varsity rowers
Serge H. Roy, Carlo J. De Luca, Lynn Snyder-Mackler, Mark S. Emley, Ronda L. Crenshaw, and Juliann P. Lyons 463

Basic Sciences/Regulatory Physiology

Original Investigations

Weight loss, dietary carbohydrate modifications, and high intensity, physical performance
C. A. Horswill, R. C. Hickner, J. R. Scott, D. L. Costill, and D. Gould 470

Effects of glycerol-induced hyperhydration prior to exercise in the heat on sweating and core temperature
T. P. Lyons, M. L. Riedesel, L. E. Meuli, and T. W. Chick 477

Serial gastric emptying studies: effect of preceding drinks
Carl Foster and Nancy N. Thompson 484

Effects of short-term training on cardiac function during prolonged exercise
Howard J. Green, Laurie L. Jones, and Douglas C. Painter 488

Exercise intensity-related responses of fibrinolytic activity and vasopressin in man
Mahmoud S. El-Sayed 494

Applied Sciences

Original Investigations

Effect of training on the anaerobic capacity
Jon Ingulf Medbø and Simone Burgers 501

Anaerobic performances in Black and White subjects
Pierre F. M. Ama, Pierre Lagasse, Claude Bouchard, and Jean-Aimé Simoneau 508

Bicycle pedalling forces as a function of pedalling rate and power output
Robert P. Patterson and Maria I. Moreno 512

Effect of inosine supplementation on 3-mile treadmill run performance and $\dot{V}O_2$ peak
Melvin H. Williams, Richard B. Kreider, David W. Hunter, C. Thomas Somma, Lawrence M. Shall, Michael L. Woodhouse, and Lothar Rokitski 517

Continuous assistive-passive exercise and cycle ergometer training in sedentary women
Daniel Martin and Gail P. A. Kauwell 523

Special Communications

Methods

Estimation of minimal weight of adolescent males using multicomponent models
Craig A. Horswill, Timothy G. Lohman, Mary H. Slaughter, Richard A. Boileau, and Jack H. Wilmore 528

Technical Notes

An empirical evaluation of the ACSM Guidelines for Exercise Testing
Harold W. Kohl, Larry W. Gibbons, Neil F. Gordon, and Steven N. Blair 533

Energy exchange in downhill and uphill walking: a calorimetric study
F. J. Nagle, P. Webb, and D. M. Wanta 540

Revised Information for Authors for Monthly Publication i

Policy Statement Regarding the Use of Human Subjects and Informed Consent vi

Policy Statement of the American College of Sports Medicine on Research with Experimental Animals vii

Volume 22, No. 5, 1990

Editorial 545

1987 J.B. Wolffe Memorial Lecture

Biomechanics: a bridge builder among the sport sciences
Peter R. Cavanagh 546

Clinical Sciences

Clinical Investigations

Bone mineral content of cyclically menstruating female resistance and endurance trained athletes
Carola H. Heinrich, Scott B. Going, Richard W. Pamenter, Colleen D. Perry, Thomas W. Boyden, and Timothy G. Lohman 558

Variation in bone mineral content and estimated body fat in young adult females
Joy C. Bunt, Scott B. Going, Timothy G. Lohman, Carola H. Heinrich, Colleen D. Perry, and Richard W. Pamenter 564

Bone density in eumenorrheic female college athletes
William L. Risser, Eva J. Lee, Adrian LeBlanc, Hally B. W. Poindexter, Jan M. H. Risser, and Victor Schneider . . 570

Effects of menstrual phase and amenorrhea on exercise performance in runners
Mary Jane De Souza, Molly S. Maguire, Karen R. Rubin, and Carl M. Maresh 575

Plasma volume and renal function during and after ultramarathon running
R. A. Irving, T. D. Noakes, S. C. Burger, K. H. Myburgh, D. Querido, and R. van Zyl Smit 581

Immediate and delayed effects of marathon running on lipids and lipoproteins in women
L. J. Goodyear, D. R. Van Houten, M. S. Fronsoe, M. L. Rocchio, E. V. Dover, and J. L. Durstine 588

Basic Sciences/Regulatory Physiology

Original Investigations

Effects of exercise mode on muscle glycogen restorage during repeated days of exercise
David D. Pascoe, David L. Costill, Robert A. Robergs, Jacqueline A. Davis, William J. Fink, and David R. Pearson 593

Changes in the protein nutritional status of adolescent wrestlers
Craig A. Horswill, Sung Han Park, and James N. Roemmich 599

Strength training effects in prepubescent boys
Jean A. Ramsay, Cameron J. R. Blimkie, Karen Smith, Scott Garner, J. Duncan MacDougall, and Digby G. Sale 605

The influence of exercise intensity on heat acclimation in trained subjects
Joseph A. Houmard, David L. Costill, Jackie A. Davis, Joel B. Mitchell, David D. Pascoe, and Robert A. Robergs 615

Carbohydrate-electrolyte replacement during a simulated triathlon in the heat
Mindy Millard-Stafford, Phillip B. Sparling, Linda B. Rosskopf, Bryan T. Hinson, and Linda J. DiCarlo 621

Circulatory and thermal adjustments to prolonged exercise in paraplegic women
Patricia I. Fitzgerald, Darlene A. Sedlock, and Ronald G. Knowlton 629

Body temperature rhythm and response to pyrogen in exercising and sedentary hamsters
Carole A. Conn, Katarina T. Borer, and Matthew J. Kluger 636

Applied Sciences

Original Investigations

Daily pattern of $\%\dot{V}O_{2max}$ and heart rates in normal and undernourished school children
G. B. Spurr and J. C. Reina 643

Cross-modal exercise prescription at absolute and relative oxygen uptake using perceived exertion
Robert J. Robertson, Fredric L. Goss, Thomas E. Auble, Debra A. Cassinelli, Robert J. Spina, Ellen L. Glickman, Robert W. Galbreath, Richard M. Silberman, and Kenneth F. Metz 653

Mechanical output about the ankle joint in isokinetic plantar flexion and jumping
Maarten F. Bobbert and Gerrit Jan van Ingen Schenau 660

Stance phase knee and ankle kinematics and kinetics during level and downhill running
Frank L. Buczek and Peter R. Cavanagh 669

The health belief model: predicting compliance and dropout in cardiac rehabilitation
Neil B. Oldridge and David L. Streiner 678

Special Communications

Methods

Using smoothing splines for detecting ventilatory thresholds
Duane L. Sherrill, Stewart J. Anderson, and George Swanson 684

The accuracy of self-reports of physical activity
Robert C. Klesges, Linda H. Eck, Michael W. Mellon, William Fulliton, Grant W. Somes, and Cindy L. Hanson . . . 690

The Caltrac accelerometer as a physical activity monitor for school-age children
James F. Sallis, Michael J. Buono, Julia J. Roby, Dana Carlson, and Julie A. Nelson 698

Accurate prediction of $\dot{V}O_{2max}$ in cycle ergometry
Thomas W. Storer, James A. Davis, and Vincent J. Caiozzo 704

Technical Notes

Genucom knee analysis system: reproducibility and database development
Carl L. Highgenboten, Allen Jackson, and Neil B. Meske 713

A simulation of speed skating performances based on a power equation
G. J. van Ingen Schenau, J. J. de Koning, and G. de Groot 718

Anthropometric estimation of muscle mass in men
A. D. Martin, L. F. Spenst, D. T. Drinkwater, and J. P. Clarys 729

Letter to the Editor-in-Chief

Letter to the Editor-in-Chief
Steven E. Robbins and Gerard J. Gouw 734

Response
Ted S. Gross and Richard P. Bunch 735

Volume 22, No. 6, 1990

Clinical Sciences

Clinical Epidemiology

Catastrophic injuries and fatalities in high school and college sports, fall 1982–spring 1988
Frederick O. Mueller and Robert C. Cantu 737

Caloric expenditure, life status, and disease in former male athletes and non-athletes
Timothy J. Quinn, Homer A. Sprague, Wayne D. Van Huss, and Herbert W. Olson 742

Clinical Investigations

Alterations in plasma volume and protein during cycle exercise throughout pregnancy
James M. Pivarnik, Wesley Lee, Joanna F. Miller, and Jochewed Werch 751

Transient oliguria with renal tubular dysfunction after a 90 km running race
R. A. Irving, T. D. Noakes, R. I. Raine, and R. van Zyl Smit 756

Patterns of weight loss and regain in wrestlers: has the tradition changed?
Suzanne Nelson Steen and Kelly D. Brownell 762

Running speed and spinal shrinkage in runners with and without low back pain
G. Garbutt, M. G. Boocock, T. Reilly, and J. D. G. Troup 769

Basic Sciences/Regulatory Physiology

Original Investigations

Cardiovascular adjustments to exercise distributed between the upper and lower body
Michael M. Toner, Ellen L. Glickman, and William D. McArdle 773

Differences in epinephrine and substrate responses between arm and leg exercise
Steven P. Hooker, Christine L. Wells, Melinda M. Manore, Stephanie A. Philip, and Nick Martin 779

Atrial natriuretic peptide and the renin-aldosterone axis during exercise in man
Edward T. Mannix, Paolo Palange, George R. Aronoff, Felice Manfredi, and Mark O. Farber 785

Effects of dehydration on gastric emptying and gastrointestinal distress while running
N. J. Rehrer, E. J. Beckers, F. Brouns, F. ten Hoor, and W. H. M. Saris 790

Cutaneous vascular reflexes during exercise in the heat
Anita Tripathi, Gary W. Mack, and Ethan R. Nadel 796

Operation Everest II: ventilatory adaptation during gradual decompression to extreme altitude
Robert B. Schoene, Robert C. Roach, Peter H. Hackett, John R. Sutton, Allen Cymerman, and Charles S. Houston 804

Maximal inspiratory pressure following maximal exercise in trained and untrained subjects
J. Richard Coast, Philip S. Clifford, Timothy W. Henrich, James Stray-Gundersen, and Robert L. Johnson, Jr. 811

Applied Sciences

Original Investigations

Physiological and performance responses to overtraining in elite judo athletes
Robin Callister, Robert J. Callister, Steven J. Fleck, and Gary A. Dudley 816

The effects of arms and countermovement on vertical jumping
Everett A. Harman, Michael T. Rosenstein, Peter N. Frykman, and Richard M. Rosenstein 825

Effects of a prolonged maximal run on running economy and running mechanics
Don W. Morgan, Philip E. Martin, Fred D. Baldini, and Gary S. Krahenbuhl 834

Physiological responses to different cross country skiing techniques on level terrain
Martin D. Hoffman and Philip S. Clifford 841

Mood and self-motivation in successful and unsuccessful female rowers
John S. Raglin, William P. Morgan, and Amy E. Luchsinger 849

Special Communications

Technical Notes

Venous and fingertip blood to calculate plasma volume shift following exercise
Ronald G. Knowlton, Dale D. Brown, Ronald K. Hetzler, and Linda M. Sikora 854

Accuracy and reliability of the Caltrac accelerometer for estimating energy expenditure
Georgia Pambianco, Rena R. Wing, and Robert Robertson 858

Prediction of functional aerobic capacity without exercise testing
Andrew S. Jackson, Steven N. Blair, Matthew T. Mahar, Larry T. Wier, Robert M. Ross, and Joseph E. Stuteville . 863

Trend analysis for repeated measures designs
Donald Holbert, Thomas C. Chenier, and Kevin F. O'Brien 871

Letter to the Editor-in-Chief

R. Burstein and E. Galun 879
